

# THE EMPRESS EXPRESS

VOLUME XV, No. 26

EMPRESS, ALTA. THURSDAY, Nov. 24, 1927

Price: \$2.00 Per Year

## United Church

Church School, 2:00 p.m.  
The primary responsibility and obligation of the church is the religious education of its childhood and youth.  
The afternoon hour should be popular at this season.  
Public worship, 7:30 p.m.  
To fill the heart with thoughts noble and pure, and to train the mind to seek out the meanings of God's word and His providence, is not a privilege for the few, but an obligation and a virtue for all souls who take life earnestly.  
You are invited to worship with us.  
Rev. N. W. Whitmore, Minister

## To Commence At 8 P.M.

Commencing first week of December, the weekly Picture Shows will commence at 8 p.m.

Remember the Printer. How about your subscription? See us for Clubbing Offers with newspapers and magazines.

## Dress Shoes

Ames, Holden and McCready make. Good solid leather sole, just right for Winter weather. Black and brown, metal calf and kid uppers.

## WORK SHOES

Pancho shoes, with or without toe-cap and outside counter. Real Winter heavy wear shoes.

## UNDERWEAR

Stanfield's Golden Label and Winter weight. Slightly fleeced, natural color. Moderately priced.

## Early Ordering for Christmas

We would appreciate your inspection of our stock of

China ware, Ivory, Pipes, Glassware, etc.

If you do not find your choice among this selection our Catalogues are open and at your service. Make your selections early.

## "SANDY," Jeweler & Clothier

"You Ought To Be In Sandy's Shoes"

The Best Coal in the Drumheller Field

Good stock always on hand. Also nice Large Stove Coal. Phone your orders and save money. We will deliver direct from the Car.

Nice Dry Kindling

'Phone 58

## The Empress Lumber Yards

J. N. ANDERSON, prop.

'Phone 58

## CHRISTMAS GIFTS

Your early selection of Christmas Gifts at our Store is solicited. Should you be unable to make your choice from our stock our catalogues are at your disposal. Call early and avoid disappointment.

EMPRESS DRUG CO.

## Wedding

Tuesday evening, November 22, at the United Church Manse, by Rev. N. W. Whitmore, Henry Souvay and Adeline Angerman, both of Burstall. They were attended by Mr. and Mrs. I. O. Robbins, of Estuary, with whom Miss Angerman has been living.  
The bride was prettily gowned in white Georgette and silk, and wore a bridal veil trimmed with orange blossoms. The young couple to whom we extend our best wishes, will reside on the groom's farm south of Empress.

A number of our townpeople have been on the sick list with heavy colds.

Weather conditions which have been stormy and cold all throughout the entire month, changed to warmer temperatures the past few days. A chinook wind putting another crimp in threatening activities.

## Local Curlers Organize For Season's Game

A meeting of the Empress Curling Club took place in the hotel room, on Thursday evening, November 17. A change in officers took place. J. N. Anderson, was elected to the presidency and Wendell McKie to the Secretaryship.

It was resolved to have all the curling rocks ground and the cost of same charged to the Club. I Clark was to oversee shipping of same.

Light and heat are to be allowed by Curling Club to skating rink.

Membership fee was fixed for the season at \$10

## "Children of Divorce" Showing at the Empress Theatre

"Children of Divorce" showing at the Empress Theatre one of the biggest attractions of the year is from the pen of Owen Johnson.

It tells the tale of youth without the fostering hands of parents; parents more interested in their own lives than in the welfare and happiness of their offspring. The action is localized among the younger set of the idle rich class and Paramount has been more than lavish in providing sets and wardrobe. It is pronounced one of the most intriguing of films.

## W.M.S. Meeting

Special attention is directed to the November meeting of the W.M.S. to be held in the United Church on Saturday afternoon next, November 26, at 8:00 p.m. The program will feature the Jubilee of Confederation, and is being prepared with the assistance of C.G.T. groups. The Autumn Thank offering will be received.

A welcome is extended to all. We have some mighty nice samples of Personal and Autograph Greeting Cards for your inspection. Prices to suit every pocket. Call early.

## Our World

Though their folks complaining With words upon their faces, I always think this old world is The jolliest of places.

Because I sing a little song, As on my way I'm going, In spite of any sorrowing My heartache is not showing Winter fete may deign to give.

I smile the while I take it, For I have learned this old world is Just what you choose to make it.

—Edgar Daniel Kramer

IN MEMORIAM  
DAVIDSON—In loving memory of our dear brother, Thomas, who passed away Dec. 8, 1926.  
"Love and remembrance live forever."  
—Entered by brother and sisters

The L. TUCKER HARDWARE Service with a Smile

## Rev. L. J. Tatham Takes Up New Appointment

Rev. L. J. Tatham, left on Tuesday morning for Saltreux, Sask., having been appointed recently to charge of that parish by the Bishop of Qu'Appelle. People of those parts deplore the departure of Mr. Tatham, which was necessitated very largely on account of ill-health. Every one will wish him success in his new appointment.

## Dates Selected For U.F.A. Convention

The 1928 annual convention of the United Farmers of Alberta will be held from January 17 to 20, it is announced from the office of the U.F.A. in Calgary. It is likely that Calgary will be selected as the meeting place, last year's convention having met in Edmonton. Resolutions to be submitted to the convention are already coming in to the U.F.A. office and a busy four days' program is anticipated.

## School Lands Bring High Prices

High prices have been realized for parcels of school lands sold by auction in various districts in the province during the past week. One quarter section at the Veggieville sale established the high mark of \$75 per acre, and an average price of about \$40 per acre is reported for the 219 quarters offered.

At Vermilion 21,000 acres were disposed of, the aggregate return being some \$200,000 and the highest priced quarter bringing \$31 per acre. Here about sixty per cent of the land was purchased by Ukrainian farmers. Most of the land disposed of is located along the new C.P.R. branch line in territory which is settling rapidly.

A similar sum was realized at Lloydminster where 202 parcels were sold, the highest price being 39.50 per acre, with the average between 30.00 and 35.07 per acre. These sales have been conducted under the direction of W. F. Rollins and E. E. Woods of the federal department of the interior.

Alaskan Creamery will be buying live or dressed Turkeys, Ducks and Geese two live Fowls and Chicken from November 28 to December 10. For full particulars apply to Central Creamery, Alaska.

## Tamworth Boar

A registered Tamworth Boar, long bacon type, direct from the Experimental Farm at Swift Current, for sale at now at the home of the undersigned. Best time from Dec. 15 to Jan. 15—C. Rogers.

## R. M. of Mantario

Minutes of meeting of Saturday, November 12th, 1927, held at Trossley school.  
Present: Reeve Rivers, Cus Edwards, Kiuch, Douglas and Batty.

Minutes of previous meeting read and confirmed on motion of Cus Edwards. Treasurer's monthly statement accepted and filed on motion of Cus Batty.

Batty—That grants of \$25 be made to the Red Cross Society and the Salvation Army respectively.

Kiuch—That the following accounts passed by the finance committee be paid.

Tax Sale costs advic: King's Printer, 1935; Alaskan News, 1935; Empress Express, 1935. Total, \$8.05

Alaskan News, stationery, etc. 35.00; Dep. Agric. brand books, 21.00; O.K. Rubber Stamp Co., \$20.00; Sect. Treas. postage, etc., from July, 48.01; Stationery Supplies Committee, 5.75, Total, 112.86

Estonia Hospital, patients fees, 102.00; Empress Hospital, 158.00; Alaskan Hospital, 202.00; Estonia Hospital, 78.50; St. Paul's P.O.p., Saskatoon, \$325. Total, 927.00, Battelleford Mental Hospital, 360.00.

Division I, Empress Lumber Yds., culverts, 32.65; Div. III, ditto, roads maintenance, 33.65; Ditto, 8.25; Ditto, culverts, capital cost, 72.10. Total, 146.65.

Richardson Road Machinery, maintenance, Div. I, 355.00; J. McCurdy, roads maintenance, Div. III, 14.50; Canada Ingot Iron, maintenance, Div. III, 250.00; Maintenance machinery assets: Alaskan Hardware, 1.55; K. Baker, 16.00.

H. Kipper, poundkeepers compensation, 11.50; Stationery Supplies, 5.00; Remington Typewriter, 2.00; W. T. Hingston, roads, Div. V, capital acct., 21.00; Ditto, maintenance, 8.00; J. Brunt, roads, Div. V, maintenance, 22.00; Monart, McCutish & Co., Audit Fees Verification, 0.10; Empress Hardware culverts, Div. I and III.

We are agents for all magazines and newspapers. Give your orders to the "Empress Express."

## SALE NOTICE

To whom the same may concern: Notice is hereby given that by virtue of power granted under Section 27 of "The Mayor, Aldermen and Council of the Rural Municipality of Mantario No. 295."

One small Black Mare, near in foal, hind feet blind, branded \$ on right thigh.

## Violent Gales In British Isles Take Heavy Toll Of Life

London.—Violent gales which reached hurricane proportions in many sections of the British Isles during the weekend may have taken a toll of 17 lives. Reports from widely scattered districts brought the known death toll to 26, while 28 Irish fishermen were reported missing and believed dead, in a despatch from Belfast. The list of known dead included 12 Irish fishermen.

The storm also brought injury to scores of persons in addition to causing heavy property losses, traffic delays and broken communications. The effect of the storm was felt in Southern England, but it was worse in the north counties, where Ireland was cut off from England by interrupted cables.

The fatalities were widely scattered, largely being the result of the collapse of walls and small buildings, while others were due to falling trees that blew pedestrians and cyclists in to the paths of heavy vehicles.

Roads, chimneys, and telephone poles were rased in the blow, which reached a maximum of 75 miles an hour as officially reported in Italy.

A sanatorium at Llanerch was flooded and three patients drowned, the others being rescued with difficulty in small boats. Most of them were suffering from exposure. The collapse of a tenement house with the serious injury of many persons and narrow escapes from death was reported in Manchester.

Consular dispatches reported that a steamer, *Imogene*, was blown over the whole of Denmark, the sea on the west coast exerting enormous pressure on the vessel. This vessel had been seriously delayed.

Tumultuous seas, driven by the gale, beat on the west coasts of England, and a floodwind was now sweeping across the fields to the town where houses were flooded and numerous families had to be rescued.

The bodies of a woman and child were recovered, while it is feared that other lives may have been lost. Schools and medical clinics have been using used for sleeping quarters.

### Western Prize Winners

Women Capture Several At Handicrafts Guild Exhibition  
Montreal.—Western Canada was represented among the prize winners at the Canadian handicrafts guild exhibition now being held here.

Among Western prize winners were: Pottery, special prizes, Miss Mary Corbett, Spokane, Wash.; and for general designing, Mrs. J. H. Stewart, Lethbridge, and Mrs. E. T. Bond, Kelowna, B.C.; Mrs. E. W. Grande, Delta, Alta.; and Mrs. E. W. Ansey, Vancouver, B.C.

### Provides Home For Aged

New York.—James Warfield, president of the Seaboard Airline Railway, who died at Baltimore, left a will in which he directed that his residuary estate, estimated at \$500,000 to \$100,000, be used to found a home for dependent aged women, in memory of his mother.

### Prince Goes Hunting

Melton Mowbray, Eng.—The prince into his hunting clothes while aboard an express train speeding from London, the Prince of Wales arrived here to start out with the hounds and hounds, his first fox hunt of the season.

## Air Mail Service Across Canada Is Predicted For The Near Future

Ottawa.—Canadian air mail officials announced that inquiries have been received from 15 cities desiring of forming flying clubs as a step in the development of civil aviation in the Dominion.

These requests for information have arrived from various parts of Canada, and clubs at Edmonton, Regina, Montreal and Ottawa already are in the process of formation.

Actual flying activities are not scheduled to begin until next spring, at Vancouver.—Transcontinental air mail service which will cross Canada about two days is a development

### Purchase Valuable Horses

#### Pick Of Champion Heavy Horses Of

Montreal.—What is considered to be the finest and most valuable shipment of horses ever to reach Canada arrived in Montreal recently from England and Europe on board the Canadian Pacific freighters *Dawson* and *Holbrooke*.

The animals are owned by W. J. McCallum of Brampton, Ont., and Regina, Sask., and represent the pick of the champion heavy horses of England, Scotland, France and Belgium, having been purchased by McCallum during a 20,000 mile motor tour of the west coast of the British Isles and two countries of Europe. Some idea of the value of the shipment can be gained by the fact that one of the horses included in the shipment, Lord Willoughby, was purchased by Mr. McCallum for a sum exceeding 10,000.

By his present plans, the horses will be exhibited first at the Winter Fair, November 16 to 21, in Toronto, and then shown at the International Fair at Chicago in the early part of December.

### Asking Parliament To Approve Trade Treaty

#### Canadian-Czechoslovak Agreement Is Being Drawn Up

Ottawa.—Parliament will likely be asked at the coming session to ratify a trade agreement between Canada and Czechoslovakia. Negotiations for such a treaty have been in progress since the fall of 1918, and it is now well advanced.

Under the terms of the provisional treaty, for the regulation of trade relations, this provisional arrangement, signed shortly before Christmas last, will expire next spring.

At present a provisional treaty only, for the regulation of trade relations, this provisional arrangement, signed shortly before Christmas last, will expire next spring.

### Strike Still On

#### Some Coal Miners Are Working In Harvest Fields

Brumfield, Ala.—The situation in the Drumfield coal fields, where a strike has been in progress for some days, remains unchanged from the first day. There has been no excitement of any kind. The operators are standing quietly against the miners, and have refused to meet the men in joint session.

The strike has had no good effect, it is felt, the shortage of labor in the harvesting fields, many of the striking miners going out at \$6 per day.

Approximately 1,000 miners in 16 mines went on strike demanding recognition of the Canadian union.

### Wheat Yield Record Broken

Lethbridge.—All wheat yields in a season of autumn returns went to the board when J. E. Cook, of Marsh, 21 miles South of this city, reported a return of 176 bushels on a piece of land. The yield was made slightly over two acres. Mr. Cook credits for the truth of the yield.

Multiple election 'planes which will be able to carry several passengers at the same time, is the subject of the present difficulties confronting nationwide services, the general belief. "It has been suggested," General Macleod said, "that the Government divide the air mail service, one branch operating in the north and the other branch, operating the route across the prairies. This is only a suggestion, however."

### Schwartzbard Acquitted

#### End Of Sensational Murder Trial In Paris

Paris.—At the end of the eighth day of one of the most remarkable trials ever conducted in Paris, Samuel Schwartzbard, accused Jewish assassin, who assassinated General Sir Peter, Christian, separatist leader, on a Paris street corner 15 months ago, was not free by the Court of Assizes.

Schwartzbard was acquitted on all criminal counts, but as condemned as the actions of French courts—to pay nominal one-franc damages to the family of the victim.

The verdict was returned in 22 criminal counts, but was condemned as a terrible blow, but nothing, announced the acquitted which was greeted with a howl of approval by the jammed courtroom.

Most of the 800 spectators remained and cheered, lauded and cried.

### Chicago Mayor Elected

#### Mayor Of Milwaukee Will Not Align Himself With Unworthy Cause

Milwaukee, Wis.—Mayor William Hale Thompson of Chicago, who has declared his intention of delivering a speech to the "British propaganda," received several wordless thrusts from the pen of Mayor Daniel W. Hoan, who may be expected to become aligned with the nationwide movement to foster "better citizenship."

Involving the invitation of the arch foe of "British failed efforts" to help launch the "American first front" calling for a membership fee of \$10, Mayor Hoan says that "many in Chicago and all of the auxiliary district officers need an educational program to learn respect and loyalty to national government, constitutional and fundamental laws," but remarks that "we are too busy in Milwaukee making local government worthy to respect to indulge in halcyon play."

### Carolist Movement Grows

#### Severe Censorship Has Been Established In Roumania

Vienna.—Reports from Belgrade say a severe censorship has been established at Bucharest on all news. Telephone communication between Belgrade and Bucharest has been cut off and only official telegrams are arriving at Belgrade from the Rumanian capital.

The Carolist movement, however, is known to be assuming a most serious character, and disappointment with the Government is declared to be increasing. Many of the Carol supporters have been arrested.

Another dispatch says "violence has broken out in Bucharest."

### Return Austrian Property

Ottawa.—Canada has returned Austrian property requisitioned during the Great War. Incess for an settlement of the reparations claims as well as the two countries also has been established. Announcement of the settlement is official, made following the coming of J. O. G. Gardiner, premier of Saskatchewan, after proving an agreement along these lines which was signed on Nov. 18, 1918.

### Immigration Service Chief

J. Bruce Walker, chief of the Canadian Immigration Service in Europe, who declares Canada is seeking healthy and self-reliant settlers from Great Britain.

### Great Issues Behind Flag Controversy

#### But Question Settled By Common Sense Is Comment Of Press

London.—"Common sense" is a term used in practically every English newspaper editorial in the discussion of the question of the flag controversy in South Africa.

"Common sense has won the day," declared the Daily Telegraph, which declares the result "a complete settlement, honorable to both sides" to the flag controversy. "If the flag question had gone to a referendum (as had been proposed by Premier Hertzog) all unprejudiced observers believe great damage would have been done to the relations between the two white races in South Africa," the Telegraph says.

The Daily News appreciates the fact that there were great issues behind the flag controversy, "otherwise it would be difficult to write with entire gravity about the details which might so profoundly have affected the daily life of a continent."

The News adds, however, that men have fought and died for less substantial forces.

Wolves In Fort William Area  
Fort William, Ont.—Lured south by abundance of wild game, packs of wolves are being driven into the Alaskan territory, have been seen in the forest country west of Fort William, Indians and trappers of the Lake of the Woods district state that the marauders are fast debuting deer and other small game and in isolated instances have attacked trappers. The wolves, who are said to be of the Alaskan variety, have been seen in widely scattered areas.

### Would Frustrate Robbery

London.—Plans for a holdup of the clearing house for city banks were to be frustrated by the introduction of the authorities an increased number of police officers and detectives have been stationed in the vicinity of the clearing house every morning for some time while clearings are being made.

## New Light Is Thrown On Settlement Of The S. African Flag Question

### Proposed Flight Of Dirigible Abandoned

#### Visit Of Los Angeles To Canada Has Been Cancelled

Washington.—Lack of an adequate and experienced landing crew at Ottawa caused the navy department to abandon the proposed flight of the dirigible *Los Angeles* to Canada.

The dirigible, carrying Sir Philip Sassoon, British under secretary for air, and Assistant Secretaries Warner of the Navy, Division of the War Department and McCracken of the Commerce Department, was to have made the trip across the international boundary for the first time to give Sir Philip an opportunity to inspect and observe the ship. He probably will be taken instead on a test flight from Lakehurst, N.J.

A crew of between 200 and 250 men is required to handle the *Los Angeles*. This number would not be available at Ottawa during the time when the *Los Angeles* would have arrived, the navy said in cancelling the flight.

### Smallpox In Ottawa

#### Mild Epidemic Results In Order For Compulsory Vaccination In Schools

Ottawa.—Compulsory vaccination for all school children in Ottawa in an campaign to suppress the mild epidemic of smallpox in the city was ordered by the city board of health.

Four five vaccination bureaux will be opened immediately and no child will be permitted to attend school or other educational institution unless provided with a certificate of vaccination.

This is the first time in the history of Ottawa that such an order has been issued.

Since October 1 there have been 161 cases of smallpox reported in the city and suburbs. Dr. T. H. Lamer, city health officer, informed the board today. Hopewell Island Smallpox Hospital is said to capacity with 24 cases, the largest number in the past ten years.

### Protest Slavery Methods

#### Question Raised In Connection With Child Labor In Rhodesia

London.—Another angry anti-slavery with the British Empire, the seems within a week, has been raised in connection with legislation recently adopted in Southern Rhodesia which is said to authorize indenture of child labor work in mines and the whipping of boys for disobedience.

The Westminster Gazette, which leads the campaign, points out that the legislation applies to children of any age, girls as well as boys, thereby raising grave sexual questions. It is in the neighborhood of 100,000 by the British Government. The Anti-Slavery Society also is appealing to parliament.

Cape Town, South Africa.—New "the" remarks, "It will be to history to tell the full part the East of Attitude played," but it is enough say here that the trust in His Excellency's wisdom and sagacity was an important element in the combination that made the negotiations between Premier Hertzog and General Smuts possible."

Then follows a reference in The Times to speeches made by L. Col. Smuts, which, "without giving the slightest offence to any section of the community, managed to give South Africa a new and more dignified in the attainment of racial peace."

### A Grain Armada

#### Over 100 Ships To Carry Wheat From Vancouver To Great Britain

Vancouver.—More than 100 ships have been chartered to carry 250,000 tons of wheat from Vancouver to the United Kingdom and the Continent during November, December and January, according to spokesmen at the Vancouver Merchants' Exchange. Of this great fleet, there will be forty vessels loaded here, seven from Seattle, one from Tacoma, and approximately 10,000, 600 barrels.

To date very little space has been taken for Oriental shipments which are, at present, only small parcel lots. During December and January, however, it is expected that Japanese requirements will begin to move in volume.

### Motion Pictures At Coast

#### Cinema City, Canada, To Be Established On Vancouver Island

Vancouver, B.C.—James J. Wright of San Francisco and associate Major Bruce Carter, United States Army, retired, San Francisco, have purchased a 100-acre tract on the north side of the Burrard estate near the Colwood point, British Columbia, on which to establish Cinema City, Canada. The price paid for the tract was \$100,000.

Cinema City will be a fully-equipped motion picture colony, with modern equipment and will occupy 50 acres.

## Canada's Great Problem Is Populating Northern Reaches Of This Continent

### There Are A Great Many People Who Speak Of An Anglo-Saxon Race Which Does Not Exist And Prove Old Cliché

Toronto.—"There are a great many people who speak of an Anglo-Saxon race which does not exist and prove old cliché," declared Hon. J. G. Gardiner, Premier of Saskatchewan, in the course of an address delivered at the Empire Club weekly luncheon here. The subject of the speaker's address was "Building a Nation in the North—Part of the North American Continent." After tracing the history of the British people for a considerable period of time, Mr. Gardiner said:

"There is not a Welshman, or a Welshman, or a Highland Scotchman will one drop of Saxon blood in his veins."

Mr. Gardiner stated that the problem confronting Canada were in an essential respect different from those through which the United States had passed, and were, after all, merely a repetition of the experiences of the rest of the great nations.

He predicted a population of 25,000,000 in the Dominion by 1950. Saskatchewan, said the speaker, was the most cosmopolitan in population of any province in Canada.

"I sometimes think we are under-

going to build a nation backwards," said Mr. Gardiner. "We have to consider the Canadian's problems on a broad, national basis rather than territorially; encouragement not only of so-called Anglo-Saxon, but of other selected immigration movements, and the development of the vast resources of the territory across Canada from the other side of the southern part of the Hudson's Bay, particularly by building of additional channels of transportation were treated and discussed by the Western Premier.

"The great problem before Canada today, assuming part as much to the West as to Canada, is how we can best, within the British Empire, build a nation on the northern half of the American continent," Mr. Gardiner declared.

"There are many ways in which our country can be carried to the heights of wealth and power," said the speaker. "We in the West are known as an agricultural people, and we are the first to realize and be proud of that fact. But we do not feel that agriculture should be exaggerated in importance to the exclusion of industry or any other industrial development."

Here is a recent picture of Lord and Lady Willoughby taken at Anse-au-Loup, Quebec, Ontario, the scene of Canadian open and international play several weeks ago.

# Call To Young Manhood To Go North, Where Canada's Greatest Wealth Is To Be Found

Premier Gardiner of Saskatchewan, speaking from the summit of Grouse Mountain a few weeks ago, gave Canadians a message that was well worth pondering over. He gave men cause to think of the future of the Dominion, and he gave them inspiration from contemplation of the past.

The "little giant of Saskatchewan," as he has been described, minced a poor immigrant to the prairies from old Ontario, by his dogged perseverance and determination worked him self up from the labor of a farm hand to the office of prime minister. Out of his knowledge of Canada and from his wealth of personal experience he sent a call ringing out to the young manhood of the nation, to "cut a swath from the ribbon that hugs the border, and go north, where Canada's greatest wealth of natural resources is to be found."

Just as Horace Greeley advised the young men of the eastern United States to "go west"—and they went and built up the republic—so Premier Gardiner calls for young Canada to adventure forth and build up the Dominion in the Northwest where vast stores of wealth are waiting for the fortunate prospectors; where water powers are waiting energies that could be harnessed for the development of the land and the prosperity of the Dominion.

And Premier Gardiner in painting his picture of the future used on his palette the colors of the past. He told how the pioneers of other days had ventured forth from the eastern settlements to construct new homes and new wholesome communities that today form Canada's backbone.

His call was to men of courage, of vision, and of enterprise, and to such, he said, there must come success.

The nineteenth century, he said, had belonged to the United States; the twentieth to Canada. He told how in 1900 the population of Canada was equalled that of the United States just one century before. In 1910 the Dominion had a population almost identical with that of the United States in 1910, and in 1920—even after four years of warfare—Canada had within a few thousands of the number of people that the United States had in 1920. So, he continued, a comparison of conditions with the republic would show that the Dominion was catching up just exactly one century behind the United States, and he felt confident that by 1950 Canada would have twenty-three million people.

If Premier Gardiner is a true prophet, the Dominion is indeed the land of destiny and its progress in the next twenty-five years will be phenomenal. —Vancouver Province.

## Fight In London Zoo

Canadian Bison Kills American Rival In Hard Battle

A furious fight between a Canadian and an American bison took place at the Zoo, the American animal being gored to death.

"Punch," who occupied an enclosure with three cow bison, was the victor and "Silly Bill," who shared a paddock with "Lady," was the victim.

As the conflict took place at night, when no one was present, the scene between the battling bison can only be conjectured, but with such powerful and powerful animals, it must have been awe-inspiring. Both weighed a ton and, though Punch was the smaller of the two, he was younger and stronger than Bill and his massive, shaggy head was larger, as is characteristic of the Canadian race.

In the morning the heavily barred gate between the paddocks was found to have been broken down, whilst in a far corner lay the body of "Silly Bill" with a large hole in the side and almost all his ribs broken. "Punch," surrounded by the four admiring cows, stood calmly on the brow of the slope, the Canadian bison standing in the foreground of the Prairie. He had escaped without a scratch.

Marks and stains upon a stone wall suggest that "Punch" had hauled his bony antagonist against it.

## Report Scandinavians Coming To Prairies

Five Thousand Are Expected To Arrive Next Spring

Arrangements are being made to bring 5000 Scandinavian families to the prairies next spring, according to an announcement made recently by Carl Jacobson, superintendent of the Scandinavian Colonization and Settlement department of the Canadian Steamship Lines. Mr. Jacobson is an expert on immigration and he will direct the immigration of Scandinavians immediately upon their return home.

Mr. Jacobson is completing a tour of Western Canada in the interest of the Scandinavian agricultural program on farms. He stated he was well pleased with the district and will circulate literature freely about it.

## Winnipeg Newspaper Union

The Winnipeg Newspaper Union, which has been in existence for some time, has been successful in securing a handsome fund of rich yellow color and very productive.

Mountain Sheep For British Columbia Fifty Rocky Mountain sheep have been supplied to the British Columbia Game Conservation Board by the Canadian National Parks Park of the Department of the Interior. These sheep were captured near the Rocky Mountains National Park and they will be used to stock a former range of the species near Spanish Bridge, B.C.

## Crab Apples

May Be Grown Successfully In Western Prairies

Most varieties of crab apples are very hardy and may be successfully grown even where the winters are quite severe. This fruit is generally very popular for preserving and jelly-making purposes and finds a ready market in the cities. There are many varieties of crab, and some outstanding ones are described in an Experimental Farm bulletin on the "Cultivation of the Apple in Canada." A very profitable variety to grow is the Hyslop which is very hardy and productive and an excellent keeper and jelly maker. Another fine crab apple is the Martha, which is large, highly colored and very hardy. One of the best known of these apples is the Red Sentinel, a handsome fruit of rich yellow color and very productive.

## Mountain Sheep For British Columbia

Fifty Rocky Mountain sheep have been supplied to the British Columbia Game Conservation Board by the Canadian National Parks Park of the Department of the Interior. These sheep were captured near the Rocky Mountains National Park and they will be used to stock a former range of the species near Spanish Bridge, B.C.

## Dr. N. Graham, veterinary surgeon, of Indian Head, has received word from Ottawa that he has been granted a copyright, on his medicine, "Tubulin," which he claims to be a cure for tuberculosis.

## The first municipal public conveyance was used in Nantes, France, in 1422. A few years later the omnibus was introduced in London.

## About 200,000, which is one-fourth of the number of Britons, are still employed.

## Pasteurizing Cream On The Farm

Simple Methods Which May Be Used For Home Pasteurizing

Pasteurizing cream is not so easily done on the farm as is the case with milk, where special equipment is provided, but in cases where it is difficult to get the cream to churn, or where there are bad flavors on the cream, when butter is to be stored, or when a mild flavored butter is desired, it will be to pasteurize. Simple methods of home pasteurizing are described in a bulletin on "Buttermaking on the Farm," distributed by the Publications Branch, Department of Agriculture, Ottawa.

When steam is available the heating can be done by putting the cream in a hot water bath, placing the cans in a tub or box of water and turning the steam into the water. These hot water baths are well suited plain bottomed in containers about 12 inches in diameter and 20 inches deep. When the desired temperature is reached the water may be drawn off and cold water or water and ice put in the box to cool the cream. When no steam is available an ordinary wash boiler filled with water may be set on the stove and hot water may be put in the cream and hot water may be put in the cream.

The cream must be stirred continuously while being heated, and cooling will be done more quickly and effectively when the cream is stirred. When the only difficulty is getting the cream to churn, 15 degrees will be enough, but for the other objects mentioned the cream should be heated to 165 to 180 degrees. Heating to these high temperatures will give the butter a cooked flavor, but it will soon pass away leaving a mild cream flavor. Pasteurizing should not be done until all the cream for a churning is on hand, and the cream should remain at a churning temperature at least three hours before churning. It usually requires a slightly lower churning temperature than unpasteurized cream.

## Thin Out Buffalo Herds

This Thousand Walworth Buffalo To Be Slaughtered This Year

To this out the herd at Walworth Park, 1300 buffalo will be slaughtered this fall and winter. The meat is sold as a commercial product and the hides and a ready market. The P. H. Hume Company, Calgary, has the contract for the killing. The Walworth herd increases too rapidly in spite of the transfer to the far north of 5,000 of the animals.

Men are queer brutes. A man's argument in a family quarrel is like slapping the front door when he starts down town.

## Training Unemployed For Canadian Farmers

Drawn Entirely From Towns Englishmen Are Proving Satisfactory

Four training centres in England in which unemployed men are trained for farm work overseas are described at some length by the parliamentary correspondent of The Times who says Canada accepts men during the training centres only during six months of the year and in the other six months (during Canada's winter and Australia's summer) Australia takes the men trained for agricultural purposes.

The correspondent says: "There are four training centres in operation. Two, at Birmingham and Wallasey, are non-residential and are designed to give the student a general knowledge of handicraft which will be of use to him in almost any industry that he enters. The other two—at Brandon and Clayton, in East Anglia—are residential and are intended primarily to attract dwellers in the towns for work on the land in the Dominion. There is accommodation also for a limited number who desire to become handy-men in this country."

At Brandon and Clayton there were in training, at the end of August 223 men who desired to go overseas, and 500 had completed the course. Of that 500, all but 12 have gone overseas and have found employment. Once on farms in Canada or Australia, in the vast majority of cases the men are reported to have proved entirely satisfactory; no small achievement when it is remembered that the men were drawn entirely from the towns and had had no experience of agricultural conditions until they began the Ministry of Labor course.

"Canada is only able to take men from the training centres during the six months of the year, and for the remaining period, therefore, the scheme depends entirely upon the migration of men to Australia."

While that door is open Canada is willing to take as many men as the training centres can send her."

## Form New Company

A company is being formed in Saskatoon to manufacture Colony brand preserves, a preparation made in Denmark. A group of local men have purchased the rights for Canada and the United States.

## Record Yield Of Potatoes

Establishing what is believed to be a world record, J. H. Hoover of Colchester, recently did a total of one hundred and seventy-one potatoes from one hill.

## Eliminate Number Thirteen

Officials Of U.S. Railway Find Passengers Dislike Hoodoo Number

One railroad in the United States, the Chicago, Burlington & Quincy, has eliminated the number thirteen from all its passenger trains. The action was taken to avoid running into the views of prospective passengers with a dislike for the hoodoo number.

"We have abolished thirteen as a number for any of our passenger trains," Passenger Traffic Manager A. C. Cawthron, Jr., of this company, said. It was done as a result of recommendations on the part of several of our selling agents. The strongest opposition to this number came from our St. Louis agency."

Mr. Cawthron said he was not prepared to say how many passengers a particular train lost as a result of removing the number thirteen as a passenger train or how many non-superstitious persons might take thirteen as a lucky number for a train, but he did say, he said, there is some prejudice against this number, and by eliminating it the feeling is removed and no harm is done to those who look upon thirteen as an innocent number.

An old bachelor says that single men who can and widows when they will.

If a girl is unable to secure a man's wages in an office she might succeed in getting him by waiting him.

## Captures Good Luck Omens

The first voyage of the sailing ship, a similar bird was captured on his ship. He commented on this strange fact that it should be on his first voyage that he captured a prize which is the fortune of few to possess or see. Besides, he says Captain Sargent regards the incidents as omen of good luck.

Captain Sargent has been serving with the Canadian Pacific for many years being in constant service since 1903. He has been in command of the Maritime Prince, Bellefleur, Iqaluit, Beavertail and Baffin.

## Some New Light Is Thrown On Difficulties Encountered In Securing Suitable Emigrants

Gasoline Flavor In Dairy Butter

Exhaust From Gas Engines Should Be Kept Away From Separator

One of the main defects of butter made on the farm as compared with creamery butter is bad flavor. The flavor of butter exposed for sale is of the highest importance and no matter how good the butter may be in other respects, if the flavor is wrong, it is bound to be classified as an inferior article. On many farms the cream separator is operated by a gasoline engine with the frequent result that the butter acquires a gasoline (carbonaceous) flavor, which detracts greatly from its quality. Some suggestions to assist in the prevention of this absorption of gasoline flavor are given in a bulletin on "Butter Making on the Farm," distributed by the Publications Branch, Department of Agriculture, Ottawa. There should be a tight wooden partition between the separator and the engine. The possibility of the entrance of fumes from the engine into the separator should be avoided by having a tight connection between the engine and exhaust pipe and by directing the pipe through the roof instead of through the wall of the building. When it is possible the equipment should be so arranged that the separator is downwind from the engine and the direction of the prevalent wind. The operator should be very careful when the engine is started to avoid the gasoline odors on his hands and clothing. Gasoline should never be placed in a cream can, milk pail or any other utensil.

## Early Maturing Wheat

Mystery Wheat May Solve Problem Of Western Farmers

If the "mystery" wheat discovered by a farmer of Windsor, Alberta, realizes the world's wheat champion's expectations it will solve many problems with which the Western Canadian wheat grower is faced.

Details of the results of two years of development of this wheat on Mr. Treble's farm are published in the columns of this issue. The results so far achieved are certainly very promising, according to newspaper reports.

If the grain stands the test of time and milling and baking tests carried out under proper conditions show that it will be as acceptable to the European baker as Marquis, it should place millions of dollars in the pockets of the farmers of this country.

It is claimed that "Mystery" wheat ripens two weeks earlier than Marquis, that it will ripen in the straw without shattering, making it a better grain to harvest with the combine and that its early maturity will enable it to escape the rust and frost peril.

A wheat that ripens and can be cut by the ordinary methods a fortnight earlier than Marquis can be harvested in an earlier date and thus the first operation by a machine like the combine would have done much to offset the unfavorable fall weather conditions which have been experienced the last few weeks, had such an earlier maturing grain been in general cultivation in Saskatchewan—Saskatchewan Farmer.

## Feeding Minerals To Cows

Can Be Mixed With Grain Ration Or With Salt Supply

Feeding mineral supplements to cows has long passed the "fad" stage, and summer, when they are on pastures, it is especially the time when they can make best use of mineral feeds, storing them for gradual withdrawal in the winter. A healthy milk cow puts off large amounts of lime and phosphorus into the milk, and if necessary supply is not present in the feed the draws upon her own body for them.

Minerals may be fed in two ways—mixed with the grain ration, or mixed with the salt supply. The latter is probably the better method, as at least one of the cows on pasture will not be getting grain, or so little, that the mineral intake would be insignificant. When a mixture of two-thirds salt and one-sixth each bone meal and ground limestone is placed in a box which the animals pass daily they will supply their needs for themselves.

Man is the only animal that can be skinned more than once.

Papa, you said that Gigi had captured a military career."

"We cannot get sufficient labor from the British Isles, and Scandinavian countries to satisfy the demand," Mr. McGowan continued.

"We are making every effort to increase British immigration and bring in the maximum of British, but the non-preferred are brought in to fill out the necessary demand. We are unable to forecast just at present how many Central Europeans, or the non-preferred settlers will have to be brought in next year."

"Canada is out of step with the world in general in this colonization," Mr. McGowan said. "When the United States was settling its middle west, just as we are settling the prairies here now, they had the farming people of Britain, the Scandinavian countries, Holland, Germany and so on to draw from. In other words, they settled with the preferred stock. But today, these European countries have changed, they have become concentrated industrial countries. They are industrialized. We no longer have the numbers of farmers to draw upon to settle our country, we can just get so many. Conditions are not what they were in this respect 20 or 30 years ago, or even 10 years ago."

Feeding minerals to cows has long passed the "fad" stage, and summer, when they are on pastures, it is especially the time when they can make best use of mineral feeds, storing them for gradual withdrawal in the winter. A healthy milk cow puts off large amounts of lime and phosphorus into the milk, and if necessary supply is not present in the feed the draws upon her own body for them.

## Overcharging The Tourists

This Practice Will Have Effect Of Discouraging The Who Centemplete Trips

Few automobile highways the world over have witnessed the traffic that Canadian highways are called upon to bear during the past season. Every state in the American union sent its quota and in many Canadian cities there would at times appear to be as many United States cars on the streets as those from the Dominion. Another interesting and encouraging feature was the presence of cars from other Canadian provinces, indicating the fact that Canadian automobile travellers are beginning to appreciate the advantages and enjoyment of seeing their own country. The Dominion with its many distinctive regions offers a remarkable appeal for inter-provincial traffic—the quality levelled; most of the world Quebec, the old and picturesque, and the equally attractive northern areas where an empire is being won from the wilderness, through mining, pulp operations and the vast and fascinating prairies with their natural parks and woodland frontiers; the magnificent Pacific coast with its roads lead through unending grandeur. Too few Canadians have seen all these phases of their country with the intimacy that motor car travel permits.

What are the impressions that are being carried by these visitors? Are they of a nature that will bring a return visit next year and year besides? Generally speaking impressions are favorable and when comment is made on the principal points—condition of the roads, country, accommodation and prices charged.

The Natural Resources Intelligence Service of the Department of the Interior at Ottawa, which corresponds with hundreds of United States tourists each year, in furnishing them with maps and information for their trips, reports that the impression once shown that visitors are to the most part satisfied and pleased with Canadian hospitality. Allowances are naturally made for the fact that the Canadian tourist is fully recognized; what complaints are made are usually over lack of suitable accommodation (except in the larger centres), and overcharging. There have been some very definite accusations as to the latter in one instance a charge charged \$5.00 for a minor rental that did not justify the cost. Fortunately the Bureau of Statistics has been able to report that circumstances of the provincial government authorities and the latter acting quickly and the country had soon arranged for a refund by the shop in question.

A letter which is fairly typical of those received was from the president of the New York State Automobile Club.

"From time to time I have been receiving national maps from your department showing the location of tourists in Canada. I have passed those maps to people who have been taking trips in your road country, and they are very highly appreciated. I have been able to travel in Canada, in fact I made a trip myself to the lake section north of Kingston.

"Personally I have no complaint to make, but I have heard a number of people speak of the exorbitant charges being put on the people from the States this year over last season and other reasons. You have the people coming this year and it is not such a criticism but they had better curb their extravagance."

It will be noted from the above letter that the overcharging is largely a development of the past year and months it is checked up with sudden and careless violence it will seriously retard the movement of tourists into Canada, for new travellers with surprising swiftness learn those travellers, due to the fact that they experience each evening in the tourist camps. One very good plan for travellers is to inquire as to prices before they make purchases.

Municipal officials and merchants should take a genuine interest in seeing that visitors get a square deal in the matter of prices, and visitors themselves should not hesitate to report sharp cases so that some check may be made and the charges moderated.

## Winter Protection Of Roses

All Except the Hardy Varieties Require Attention Before Cold Weather Sets In

Rugosa hybrids, Australian bris, Provence or Cabage roses, Damask roses and Moss roses need little or no winter protection in most parts of Canada, but other roses must be protected. The methods of protection to be used in different parts of the country are clearly outlined in a bulletin on this subject distributed by the Publications Branch of the Department of Agriculture, Ottawa. In the case of the roses mentioned above, in the Prairie Provinces, where the country is open, it is desirable to bend some of them down and cover them with soil, and place evergreen boughs over them where this can be obtained. For Hybrid Perpetual, Hybrid Tea, and Tea roses more protection is necessary. A simple method of protecting Hybrid Perpetuals and Hybrid Teas, is to earth them up six or eight inches or more, then protect the lower part of the stem. Even if the roses are killed back the lower stem is almost sure to remain alive. In color the plants should be bent down and held down with soil, or where bushes are not usually pruned back they should be bent down and held with soil to preserve them. Where this treatment is not sufficient a light covering of straw, strawy manure, or leaves held in position by evergreen boughs might be tried. Good results are obtained, when these roses are fully hardened by being bent down and covering them with a box, and still further protection is afforded by bending down, putting over them a box without cover or bottom, filling this with dry leaves and putting a cover on the box which should be waterproof. For roses the most tender of all, they should be carried up as described for the other roses, and in addition covered with a box filled with dried leaves.

## Wolves Was Hard Hitter

Knox Prisoner Down In Identifying Him As Alleged Assassin

Looking over robber suspects at a Chicago police "show up" Mrs. Harry M. McDonald, a well-known young woman, suddenly stepped forward, dropped a left uppercut, followed it with a right, and then lay down and dropped one of the prisoners for a count of more than ten.

"That's the man," she cried. He is the one who choked me, tore rings from my fingers and tried to shoot my six-year-old son yesterday."

This was Leslie Thomas identified.

## Arranging For Centennial

Belgium is making active preparations for the coming of independence in the exhibition to mark the centenary of the laying of the first railroad line in Belgium and in Canada, and also the jubilee of the centenary of the Free State. Invitations to participate are being extended to other countries.

Some flappers' faces are not as bad as they are painted.

## Better Methods In Surgery

Wonderful Operations Now Possible Says New York Doctor

A man may go successfully about his work minus a leg, an arm, an eye, his tonsils, gall bladder, one kidney, half his lungs, and brain and as much as 12 feet of his intestines.

Dr. J. P. Erdman, New York, is authority for the statement. He told the Interstate Postgraduate Medical Association that the number of organs a human being can afford to lose is steadily increasing, due to better methods in surgery and increased knowledge of the functions of organs.

Recent developments he said were operations on the heart, the removal of entire lobes of the lung and the removal of the gall bladder.

## Love Their Native Land

People Of France Never Forget A National Hero

Color and beauty and have come back to France according to Mr. Dorothy McCann, of London, Ont., just returned from two months study of the life and the other members of his party, all either teachers or students, but on further study, were, in a sense, guests of the French Government during their stay, in so far as special privilege to visit places not usually open to tourists was accorded them.

French people so greatly love France," Miss McCann said. "They never forget a national hero. The name of every soldier of France is on record in some public church; the story of their valor is told in marble in a thousand places and the many magnificent war paintings sold for a very fine school of modern French art. The cathedral at Arras has been entirely rebuilt of its own stones."

"It is good to be a Canadian in France. The French are almost embarrassingly grateful to Canada, not only because, as a Frenchwoman put it, 'The Canadians came at once,' but because of the splendid conduct of the Canadian soldiers while in France."

## Canadian Indians As Agriculturists

A report of the Canadian Department of Indian Affairs states that agricultural conditions on the reserves in Canada have very much improved in the last five or six years. There are a great many more Indians farming at the present time than there were a few years ago. The number of stock on some of the reserves has more than doubled.

Ducky Skipper—"Ah, wasn't an alarm clock at a rather sharp."

Chris, Yes, indeed. "Ducky Skipper—"Ah, wouldn't you mind punchin' holes in de straw?" Ah's reime to make his husband a wrait wath."

"When I started in life," said the successful man pompously, "I resolved that my motto should be 'Get behind me, Satan.'"

"Excellent," murmured a listener. "There's nothing like starting with a lucking."

## Establishing "Brain Pantheon"

Idea Of Russian Professor Approved By Soviet Government

Deaths will not bring privacy and peace to the brains of the illustrious citizens of Russia, if their kinsmen submit to a plan approved by the Soviet Government.

The plan, already partially in operation, calls for the establishment of a "brain pantheon," where the cerebral tissue of deceased celebrities will be kept, like goldfish, in glass bowls attached to vials which will be gold plated, telling whose brain is inside and what its peculiarities are. But before the brains are so displayed, they will be dissected, microscopically examined and their characteristics tabulated in the hope that they may thus continue to serve humanity after death.

The "brain pantheon" is the idea of Professor Vladimir Bekhterev, psychiatrist and hypnotist, who told the Associated Press that the brains of the three Russian celebrities are already being dissected, and that Fyodor Dostoevsky has willed his brain to the new institution.

The brains of Anton Rubinstein, famous pianist and composer, who died in 1891; Dmitri Mendeleev, naturalist and chemist, whose work on the periodic table brought him world fame before his death in 1907; and Alexander Dohai, writer, jurist and ranking member of the Academy of Science, who died last September, form the nucleus of the pantheon.

Explaining the purposes of the pantheon, Professor Bekhterev said: "The brain pantheon sets itself two aims. First, to preserve the brains of immortals as sacred relics, thus satisfying the emotions; second, to study the relation between high gifts and the formation of brain cells and chemical secrets."

## Praise For Western Farmers

Aaron Spiro Tells New Yorkers Of Success Of West Cattle

The farmers of western Canada were praised by Aaron Spiro, cooperative marketing organizer, for their cooperative action, in an address delivered in New York before the Women's Forum.

He endorsed John Herbert Hoover, secretary of commerce, for the Republican presidential nomination, characterizing Mr. Hoover as "the greatest man in the Republican party today," and the best friend of the United States farmer.

The old gentleman tumbled over a five-barred gate just in time to save himself from the dizzy fall. "You brute," he spluttered, shaking his fist at the animal, "and I've been a 'vegetarian all my life.'"

The larger species of flying fish, found off the coast of California, can soar as far as 200 yards, according to "Liberty."

"Does your wife enjoy motor cars?"

## Was Insignificant Pawn

Man Who Threw Bomb Which Started World War Died Practically Unknown

Milan Ziganovich is dead. Who was he? Not one person in a thousand can answer. Yet it was his overt act that brought on the greatest holocaust in human history, that brought death to millions and suffering to millions. Thirteen years ago in the obscure Serbian village of Sarajevo, Ziganovich and his companions threw the bomb that killed Archduke Franz Ferdinand of Austria. The World War followed.

The world knows now, if it did not know then, that the death of the archduke was not the cause of the war. There had been bomb-throwers before Sarajevo, there have been bomb-throwers since, and their cowardly acts have not resulted in war. The note which blossomed so cruelly lay deep under the surface. Europe was honeycombed with intrigue. Everything was in readiness for the catastrophe. But a spark was needed to touch off the blaze. The bomb-thrower of Sarajevo furnished that spark.

Was he an insignificant pawn in the great game of international intrigue, and yet the bomb he threw resulted in the death of one man and the suffering of millions. So much greater were the tragic results of his deed than the man himself that he no one has thought of to praise or to blame him. Now he is dead, has gone to his death, those millions who die in the shadow of his deed, his very death, his insignificance. The man who can never be forgotten; the man whose act touched off the flame was never known.

## Grading Sheep and Swine

Saskatchewan Live Stock Branch Has Undertaken Work

At the request of the Saskatchewan Sheep Breeders' Association and the Saskatchewan Swine Breeders' Association, the Provincial Live Stock Branch is engaged in grading purebred sheep and swine throughout the province, particularly rams and boars that will be offered for sale this fall. Circulars have been sent out by the association mentioning enclosing application forms to be filled in by those who desire stock graded.

In its letter the Sheep Breeders' Association points out that the system of grading adopted by the Live Stock Branch and endorsed by the association is as follows:

Purebred rams, possessing size, type and quality, with good fleeces and sufficient breed characteristics to recommend them as stock rams for graders; or high grade fleeces are called three star rams, and have three stars tattooed in the left ear.

Fully good purebred rams which may possess size, fair type and quality but lacking in some particular breed characteristics, are called two star rams, and have two stars tattooed in the left ear. These rams are recommended for use in grade flocks.

Rams that are not good enough for either of these classes are called one star rams, and tattooed with one star in the left ear. They are generally lacking in size or quality or vigor and are recommended for use in the average grade flock.

## Development Of Aerial Photography

Notable progress has been made in Canada in the employment of oblique aerial photography for mapping large areas of the little known parts of the Dominion. By special arrangement the Topographical Survey Branch of the Department of the Interior is the central clearing house for aerial photography in Canada, over 95,000 photographs being on file in that branch to date.

## Manitoba Fox Show

Manitoba's first fox show will be held in Winnipeg from November 25 to December 2. Manitoba now has a large investment in ranch-bred foxes. Ranch equipment runs into several hundreds of thousands of dollars, and there are upwards of 5,000 ranch-bred foxes in the province, several of the larger ranches having between 400 and 500 foxes each.

## Canadian Granite For Press Rolls

Granite quarries have been in operation in Canada for many years producing building stones, monumental stones, and paving blocks, but it is only in recent years that some of the certain of these quarries has been employed for press rolls on paper-making machines.

## British Columbia Tobacco

Latest reports indicate that 750,000 to 800,000 pounds of tobacco were produced in British Columbia this year from approximately 1,000 acres. It is expected that 5,000 acres will be planted next year.

## Germany's coal output is increasing

## Now Occupies First Place

Canada Is Far In Lead In Export Of Wheat

Sir Henry Low, world-famous grain expert in the Financial Times, reviews the world grain trade classes, and says the war's disturbance of international commerce was especially marked in the grain trade, and that never again will the flow of grain from exporting to importing countries return to the old groove.

Before the war wheat came from mainly seven sources—24 per cent from Russia; 12 per cent from Argentina; 11 per cent from Canada; 5 per cent from the United States; 5 per cent from India and Rumania; and 8 per cent from Australia.

Last year's proportions were: Canada, 52 per cent; Argentina, 10 per cent; United States, 14 per cent; Australia, 10 per cent; and Hungary, 10 per cent. India, Algeria and Rumania, contributed small amounts.

With the elimination of Russia, Canada has become the world's largest wheat trade is concentrated in fewer countries.

Corn comes from Argentina, 60 per cent; United States and Hungary, 9 per cent each; Jugo-Slavia, 6 per cent; and a new-comer, South Africa, 5 per cent.

Three-fifths of the world's barley comes from Canada, with the United States, Rumania, Jugo-Slavia, Poland and Czechoslovakia, supplying lesser quantities.

Canada and Argentina now supply a third each of the world's oat and the United States one-fourth. Russia has dropped out in all these categories, where before the war, she was an important exporter.

Changes in buyers are also noted. Britain remains the chief buyer of all grains, but Japan, last entered the market. Germany and Italy take 14 per cent of the world's wheat, while Belgium and Holland are big importers. Germany and Britain are the biggest barley importers. Of oats Britain takes 55 per cent, Germany nearly as much, and France half as much. Corn buyers are Germany, 8 per cent; and France slightly more, while Spain, Norway and Italy have also increased corn requirements.

## Chance Of Success Great

Wonderful Opportunities For Young Men Of Today Says Editor

Thomas A. Edison, working so hard at the age of 30 as in his youth, would be glad to live his life over again with all its disappointments and successes, he declared in a radio interview which was broadcast through 12 stations from coast to coast.

The first notable appearance of the electrical wizard before the microphone was in an interview which was part of a radio program celebrating the 45th anniversary of his invention of the incandescent lamp.

He believed the incandescent lamp to be the most important of all his inventions. He had no advice for the nation's youth, for "youth does not take advice," he declared. They are generally the opportunities for a young man today are "far greater than at any time in the past."

## Use Of Aircraft in Canada

In addition to the forest, survey, exploration, and mining services using aircraft in Canada, the Department of Marine and Fisheries is directly interested in the use of aeroplanes in fishery protection work along the Pacific coast; the Department of Agriculture realizes their possibilities in fighting insect pests; and the Department of Customs uses them to advance time in the prevention of smuggling.

## Motocist (with large family) --

"What's the idea of asking me to stay here overnight?"

Constable: "We're taking the census tomorrow mornin' an' want to make a better showin' than last year."

## "Yes?"

"And maintained your hands?"

## "Yes?"

"Then you may kiss Fido!" -- Soa daglaine-Seris, Stockholm.

Alberta Bonds

Bringing Good Price

The sale of \$301,500 worth of Province of Alberta 4 1/2 percent bonds, due 1946, was made during last week to the Dominion Securities Company of Toronto at the very favorable price of 97.04. Eight offers were submitted by competing firms, and the bids for this large block of provincial securities, indicated a keen rivalry for their purchase.

Newest Locomotive Meets All Given Speed Tests

What is said will be the fastest and most powerful locomotive in Europe, the King George V, of England's Great Western Railway, completed a 250-mile test run over Baltimore and Ohio tracks and attracted officials of that road by hitting a 75 mile-an-hour speed with its throttle only 75 per cent open.

Laborers, office workers and motorists along the route from Baltimore to Washington and thence to Philadelphia and back to Baltimore, craned their necks as the locomotive swept by with seven coaches. With no pipes and few working parts exposed, the stream-lined English engine appeared very different from the usual American type.

Application For Beer License

Public notice is hereby given that the undersigned intends applying to the Alberta Liquor Control Board for a license to sell the giving of credit, for consumption in conformity with the provisions of the Government Liquor Control Act of Alberta, and the regulations made thereunder, with respect to the following premises:

Lots 21 and 25, Block 9, Plan 5043 AV in the Village of Empress, and known as the Empress Hotel.

Dated at Empress, Alberta, this 9th day of November, 1927—Empress Hotel Calgary Ltd., Applicant.

A Masterpiece

A young entrance pupil writing on the June examinations in a certain Ontario centre contributed the following choice bit of literature. Taking an editor for his subject, he wrote:

"An editor is a man who edits a paper. Some editors use a pen to write with, but some use scissors. Lots of editors get news from serious. Some editors are farious. Nearly all editors lie. An editor that can't lie ain't no good for an editor. An editor should like gossip. Women would make great editors only editors must keep secrets. An editor never has any money. Once an

editor got ten cents and it made him crazy. An editor never wants any pay for his paper and the people never think of paying an editor. When an editor gets a free ticket he has to give a dollar's worth of free advertising in advance. Most people know how to edit the papers better than the editors do. If the editor asks for his pay for his paper, the fellow gets mad. So it is cheaper to borrow someone else's. I once knew a woman that frightened an editor and made him crawl under a table. (This boy is said to have passed with honors.)

Heavy snowfall and stormy

weather of the past week has stopped threshing and grain hauling. A considerable quantity of threshing is still to be done in the north of town district.

Mike Stapleton, whose ranch is located on the Red Deer River north of Jenner, has recently bought a thousand head of white-faced cattle. The cattle were bought from the Webster ranch near Medicine Hat.
